

EDUCATION	University of Notre Dame	IN, USA
	<i>Ph.D. in Electrical Engineering</i>	2023 – Present
	• Advisor: Prof. Mengxue Hou. Research: robot manipulation, uncertainty-aware perception, vision-language-action models.	
	Duke University	NC, USA
	<i>M.S. in Mechanical Engineering and Materials Science</i>	2021 – 2023
	• GPA: 3.57/4.00	
	Florida Institute of Technology	FL, USA
	<i>B.S. in Mechanical Engineering</i>	2018 – 2020
	• GPA: 3.78/4.00

Under Review

1. **Yu Zhou**, Guoyue Xu, Zhiyuan Li, Ruochu Yang, Mengzhao Jia, Meng Jiang, Tengfei Luo, and Mengxue Hou, “Asking Only When Necessary: Selective Human Intervention for Lab-Protocol-Aware VLA Adaptation,” submitted to *IEEE International Conference on Robotics and Automation (ICRA)*, 2027.

RESEARCH EXPERIENCE	Protocol-Aware Human-in-the-Loop VLA Manipulation	2026.05 – Present
	• Built a framework that decides when a VLA policy should execute, ask a human, or take a correction, using action uncertainty, protocol-violation risk, and a risk predictor learned from human corrections. • Deployed $\pi_{0.5}$ (openpi) on a Kinova Gen3 arm and built the teleoperation data pipeline for fine-tuning. • First-author paper submitted to ICRA 2027.	

Uncertainty-Aware Manipulation with Bayesian 3DGS 2026.01 – Present

- Built a variational 3DGS scene model that outputs expected occupancy and its uncertainty from RGB-D observations.
- Used it in a real-time QP velocity controller with a probabilistic collision cost on a Kinova Gen3 arm (ROS 2, MoveIt, RealSense D435i).
- Presented as a poster at IROS 2026 Late Breaking Results.

Uncertainty-Aware Navigation for Underwater Vehicles 2024 – 2025

- Estimated ocean flow fields from sporadic image observations in HoloOcean simulation (UR 2025).
- Placed variational distributions on 3DGS parameters to estimate pose uncertainty for underwater localization (OCEANS 2025).

INTERNSHIPS **Brain Tool Lab, Duke University | NC, USA** 2022.05 – 2022.07

- Trained a deep learning model to plan laser orientation relative to tissue, minimizing excessive laser-induced ablation.

Fiberhome | Wuhan, China 2020.06 – 2020.08

- Designed main product structures and produced engineering drawings in SolidWorks.

SKILLS

Programming: Python, C++

Robotics: ROS 2, MoveIt, Kinova Gen3, Intel RealSense, HoloOcean

ML / Vision: PyTorch, 3D Gaussian Splatting, COLMAP, VLA fine-tuning (openpi)

CAD / Simulation: SolidWorks, ANSYS Workbench

Languages: Mandarin (native), English (fluent)

TEACHING

Guest Lecturer: EE 67074 Introduction to AI Planning (Fall 2025)

Teaching Assistant: EE 40085 Autonomous Mobile Robots (Fall 2025)

EE 30210 Random Phenomena in EE (Spring 2025)

SERVICE

Reviewer: ICRA, IROS, RO-MAN, Journal of Intelligent & Robotic Systems

Volunteer: IROS 2023

AWARDS

Academic Scholarship, Florida Institute of Technology (GPA top 10%)

2019.02
